

# The 2019 biennial meeting of the SGTSG & SGSEG

[www.sgtsg.org](http://www.sgtsg.org)

## REGISTRATIONS ARE NOW OPEN

Registrations are now open for the Convergence on the Coast meeting, being held from the 18th to the 22nd of November 2019 in Port Lincoln, South Australia.

This year the Geological Society of Australia's Specialist Group in Tectonics and Structural Geology is joining forces with the Specialist Group in Solid Earth Geophysics to present 'Convergence on the Coast'. This November the national and international research community in structural geology, tectonics and solid earth geophysics will converge on Port Lincoln to discuss the latest research and developments in these fields. The primary focus of this technical conference is to enable collaboration and exchange of ideas between the geoscience research, government and industry communities.

### Themes and invited speaker line up

The conference program will be built around a number of themes, headlined by an invited keynote speaker. We are excited to announce the following confirmed themes and keynotes.

- Observational geophysics. Keynote: *Assoc. Professor Meghan Miller, RSES Australian National University*
- Geodynamics and thermodynamics. Keynote: *Dr Elena Sizova, Karl-Franzens-Universität Graz*
- Domes, basins and dynamic topography. Keynote: *Dr Mark Hoggard, Harvard University.*
- The Australia-Antarctic connection. Keynote: *Dr Naomi Tucker, University of Western Australia*
- Experimental studies of rocks and structure. Keynote: *Kathryn Hayward, RSES Australian National University*
- Tectonic controls on mineral systems. Keynote: TBA
- Multi-scale structures and fluid-rock interaction. Keynote: TBA
- Plate margin and intra-plate orogenesis. Keynote: *Professor Gianreto Manatschal, University of Strasbourg*

### Events

There are a number of planned field trips, workshops and social events associated with the conference.

- Pre-conference Field Trip: Lithospheric structures, orogenic fronts and mineral systems: a traverse through the south-eastern Gawler Craton. Wed 13th - Sun 17th November 2019
- Mid-conference field trip: One day field trip on Wednesday 20th November, visiting the spectacular local coastal outcrops of the Southern Gawler Craton
- Post-conference Field Trip: Tectonics, magmatism and crustal growth in the southern Gawler Craton. Sat 23rd - Wed 27th November 2019
- Free Loop 3D modelling workshop: Loop is a new platform that will enable field geologists, researchers from academia and government organisations, explorers, resource modellers & managers to better define their 3D geological environment as well as assessing the requirement for optimised additional data/knowledge acquisition. The platform will be Open Source, scalable and applicable to problems from the mine-scale to the plate-scale, in data-rich and poor environment. It will serve to solve problems related to urban geology, basins resources exploration and exploitation as well as minerals and scientific exploration in poly-deformed metamorphosed terranes.
- Conference dinner and awards night: Wednesday 20th of November at the stunning Line and Label Restaurant, featuring local beer and wines as well as a selection of canapés and a seafood paella, cooked and served by their award winning chefs and featuring all local produce.

Government of South Australia  
Department for Energy and Mining

## Important Dates and Information

- Abstract submission closes 30/06/2019
- Early Bird registrations close 30/06/2019 - GSA member \$700; non-GSA member \$950; Student/Retired \$350
- Pre- and Post-conference field trip registrations close 31/07/2019
- Full registration closes 30/09/2019 - GSA member \$850; non-GSA member \$1150; Student/Retired \$450
- Spouse/Social Event only ticket closes 30/09/2019 - \$190
- Workshops and Dinner registration closes 30/09/2019

## Student Bursaries

The SGTSG and SGSEG would like to encourage student attendance at this years conference. To this end we are offering a number of student bursaries to assist with the costs of attending the Conference.

The SGTSG are committed to providing students every opportunity to gain more field experience. In addition to the conference bursaries, the SGTSG are offering a number of bursaries to directly assist SGTSG student members with the costs of attending the pre- and post-conference field trips. We encourage all students to apply, but please get in early to avoid missing out on the limited field trip spaces available.

To register, submit an abstract or for more information, please visit the conference website at <http://www.sgtsg.org>
